PROFESSIONAL SUMMARY

Analytical and customer-focused Junior IT Support Technician and QA Tester with formal software engineering background from FNB App Academy and WeThinkCode_. Possesses practical experience in automated API testing, manual functional verification, systematic IT troubleshooting, and ticket management workflows. Experienced in logging software defects, inspecting browser and server error logs, validating REST endpoints via Swagger UI, and communicating solutions in plain language to non-technical users. Seeking an entry-level IT Support, QA Testing, or Technical Support position.

CORE TECHNICAL & TESTING SKILLS

IT Support & Diagnostics: Hardware/Software Diagnostics, Helpdesk Ticket Management, System Diagnostics, End-User Support

Quality Assurance & Testing: Automated API Testing (Pytest, FastAPI TestClient), Manual Functional Testing, Form & Input Validation

API & System Inspection: REST API Verification (Swagger UI / OpenAPI), Browser DevTools (Console & Network Logs), Bug Tracking

Technologies & Scripting: Python, FastAPI, JavaScript (ES6+), SQL, SQLite, HTML5, CSS3, Windows PowerShell, Git, Vercel, Render

Soft Skills: Active Listening, Technical Writing, Calm Under Pressure, User Communication, Feedback Integration

PRACTICAL TECHNICAL & QA PROJECTS

Full-Stack Application QA & API Test Suite — **Pytest, FastAPI, React, SQLite, JWT**

Live Demo: frontend-inky-three-34.vercel.app | Source Code: github.com/KennydaNerd/hair-by-neo

- Authored and executed an automated test suite featuring 9 Pytest cases validating API endpoints, payload validation, and access control.
- Conducted comprehensive functional and boundary testing on dynamic web forms across desktop and mobile devices.
- Verified RESTful API status codes, authentication headers, and JSON schemas using Swagger UI and FastAPI TestClient.
- Investigated client-side execution issues via browser Developer Console and checked server logs on Vercel and Render.

IT Support Ticket Tracker Application — **React, Vite, JavaScript, LocalStorage**

Live Demo: support-ticket-tracker-vert.vercel.app | Source Code: github.com/KennydaNerd/support-ticket-tracker

- Designed and verified a responsive web app for logging, categorizing, prioritizing, and resolving technical service tickets.
- Implemented browser LocalStorage persistence to ensure non-volatile ticket state management across user sessions.

IT Troubleshooter Diagnostic Tool — **JavaScript (ES6+), HTML5, CSS3**

Live Demo: it-troubleshooter.vercel.app | Source Code: github.com/KennydaNerd/it-troubleshooter

- Developed a step-by-step diagnostic workflow tool designed to guide non-technical users through hardware and network issue resolution.

WORK EXPERIENCE

Freelance Web Developer 2023 – Present

Self-employed | Pretoria, South Africa

- Provide end-to-end technical website development, client request management, and post-deployment assistance for small businesses.
- Perform cross-browser testing and responsive design checks across desktop and mobile prior to publishing live builds on Vercel.

Outbound Telemarketing Specialist 2026

Pretoria, South Africa

- Delivered clear verbal communication and customer assistance in a target-driven environment, maintaining composure under pressure.
- Documented customer inquiries, handling complex requests using active listening and systematic problem solving.

In-Store Brand Promoter Aug 2022 – Dec 2023

Wendy's Girls and Boys | Gauteng, South Africa

- Engaged directly with members of the public, delivering product demonstrations and addressing inquiries face-to-face.
